12:20-1:20 p.m. Lunch

TOPIC 2: Aviation Industry Challenges and Growth Opportunities

1:30-2:20 p.m. Strengthening Operational Resilience in Aircraft, Equipment, and Airport Infrastructure
In an era of global supply chain volatility, strengthening operational resilience across aircraft, equipment, and airport infrastructure is critical to sustaining aviation growth and reliability. This session will explore how airports, airlines, and industry partners can navigate procurement challenges, streamline logistics, and build stronger supply chain networks. Discussion will highlight innovative strategies for sourcing and maintaining critical assets — from airfield equipment and passenger systems to aircraft components — and the role of collaboration, planning, and technology in enhancing flexibility and operational continuity.

Speakers: Mr. Rodrigo Ribeiro (*confirmed*)
